## By Gary Null

In *Death by Medicine*, Gary Null exposes the hidden dangers of prescription drugs and the pharmaceutical industry's role in the epidemic of overdose deaths.

Null argues that prescription drugs are the third leading cause of death in the United States, behind heart disease and cancer. He cites statistics showing that more than 100,000 people die each year from prescription drug overdoses, and that the number of deaths is rising.

Null blames the pharmaceutical industry for this epidemic. He argues that the industry has put profits ahead of safety, and that it has marketed and sold drugs that are addictive and dangerous.

Null also criticizes the medical profession for its role in the epidemic. He argues that doctors are too quick to prescribe drugs, and that they often fail to warn patients about the risks of addiction and overdose.

Death by Medicine is a powerful and disturbing book. It is a must-read for anyone who is concerned about the dangers of prescription drugs and the pharmaceutical industry.

### **About the Author**

Gary Null is a world-renowned health and nutrition expert. He is the author of more than 20 books, including The Null Diet and The Complete Encyclopedia of Natural Healing.

Null is a frequent guest on television and radio shows, and he lectures around the world on health and nutrition.
